Look at the BPO columns. If the letter Y is present for that particular commodity then a BPO exists for it. Some Agencies also create BPO's for their employees to use. These would be listed under the AGY BPO field. We are going to work with DBM BPO's for this example, but if your agency has created a BPO then you will see it in the results.

Any BPO's that start with 050 are considered a DBM BPO. Any other BPO are probably Agency related. H00 belongs to an Agency and unless you are part of that Agency you cannot use that BPO. Some Agencies create BPO's for their employees to use. You should check with your procurement Department if you have any questions.

There may be times depending on your date criteria, that you will have more than one page of information. Always look to see if there are more pages. If there are, press F8-NEXT PAGE to access the pages.
